SKILLS

Languages/Frameworks: Java, Python, SQL, JavaScript, C, React

Cloud/Devops: Docker, Kubernetes, Linux, REST APIs, GitHub Actions, Jenkins, AWS, Terraform

CI/CD & Tools: Jenkins, GitLab, Maven, Gradle, Postman, JIRA, Confluence

Databases/Data Engineering: MySQL, PostgreSQL, NoSQL, MongoDB

Certifications: Active Secret Clearance, AWS Certified Cloud Practitioner, CompTIA Security+

AI & Automation: AI-assisted development, agentic AI workflows, LLM-based tooling, AI-driven CI/CD automation

PROFESSIONAL EXPERIENCE

BOOZ ALLEN HAMILTON

McLean, VA

Software Engineer

June 2023 - October 2025

- Designed and implemented a scalable Java Spring Boot microservices architecture and RESTful APIs supporting core application functionality for a government client in a cleared SDLC environment
- Served as a forward-deployed software engineer, meeting weekly with client stakeholders to gather requirements, provide technical updates, and align software development priorities with mission needs
- Leveraged agentic AI tools to automate and streamline software deployment workflows, improving deployment reliability and reducing manual intervention in CI/CD pipelines
- Collaborated in an Agile/Scrum SDLC, participating in daily stand-ups, sprint planning, backlog grooming, and peer code reviews, while tracking work in JIRA and documenting systems in Confluence
- Built and deployed a CI/CD pipeline using Jenkins that automated Docker image creation from GitLab repositories and deployed applications to Kubernetes clusters, integrating build, test, and deployment stages to reduce manual effort and errors
- Architected and maintained a scalable AWS cloud environment using Lambda, S3, Athena, and CloudWatch to support serverless microservices, data analysis, centralized logging, monitoring, and operational reliability
- Built an AWS SFTP service end-to-end, translating client requirements into a secure, production-ready cloud solution
- Rebuilt cloud infrastructure and local development environments using Terraform (Infrastructure as Code), following version control, change management, and reproducible deployment best practices in a secure, regulated government setting

BEST BUY

Woodbridge, VA

Sales Consultant

June 2019 - June 2023

- Rapidly learned new technologies and technical product features through self-directed training, demonstrating the ability to quickly onboard to new tools and systems
- Identified customer requirements through active listening and translated needs into technical solutions, strengthening analytical thinking and problem-solving skills

LEADERSHIP & PROJECTS

PATRIOTHACKS, GEORGE MASON UNIVERSITY

Fairfax, VA

Lead Organizer

September 2020 - September 2021

- Led end-to-end planning and execution of a \$53,000 large-scale hackathon, coordinating sponsors, venues, and logistics for 300+ participants, demonstrating ownership, cross-functional coordination, and execution at scale
- Managed and analyzed multi-platform engagement strategies to drive event visibility and sponsor interest, applying data-driven decision-making and iterative improvement

VEX ROBOTICS COMPETITION

Woodbridge, VA

Captain, Builder, and Programmer

September 2012 - September 2019

- Led and mentored a cross-functional team of seven members, coordinating technical design, strategy, and execution across multiple competition environments
- Designed and iterated on robotic mechanisms using CAD software, applying prototyping, testing, and iterative improvement principles aligned with engineering best practices

EDUCATION

GEORGE MASON UNIVERSITY

Fairfax, VA

B.S. in Computer Science (Dean's List)

August 2020 - August 2023
